This chair should be considered a work chair and so its dynamic and ergonomic behaviour should be that of an operator chair. It should be made of top-quality material. It will belong to a large family which shares the same language and aesthetic concept.

FEATURES

Backrest

- ▶ Height-adjustable lumbar support.
- Backrest lock.
- Self-adjusting backrest tilt tension.

Seat

- ▶ Height-adjustable seat.

Arms

- ▷ Height-adjustable armrests.

BE WOOD WORK CHAIR

DESCRIPTION

BACKREST

14-mm thick plywood, formed and machined to an ergonomic shape. 25-mm thick block foam with a density of 40 kg/m³ is adhered to the backrest and the fabric or leather is fitted on top.

Height-adjustable lumbar support which can be adjusted 50 mm via a control on the side.

Attached to the seat with a welded metal fixture.

SEAT

Made of 12-mm thick beech plywood. 50-mm thick block foam with a density of 35 kg/m³ is adhered to this support and the fabric or leather is fitted on top. The bottom is lined with black fabric .

ARMRESTS

Height adjustable with a range of 50 mm and 5 positions. The arms slide on polyamide guides to prevent noise.

The sides of the armrests are lined with a flame-retardant barrier and 12-mm thick block foam with a density of 60 kg/m³ is adhered on top.

The entire assembly is covered with fabric or leather to order.

MECHANISM

Self-adjusting mechanism sensitive to the weight of the user. Synchronised backward movement of 18° and forward movement of 6°. 3 adjustment positions and backrest tilt lock.

COLUMN

SBS gas piston with a travel of 120 mm to adjust the height of the seat.

BASE

Polyamide base. Castors, 60mm in diameter.

- Aluminium base option.
- Castors for hard floor or soft floor option.
